

## RISK ASSESSMENT – COVID 19

RISK	ACTION TAKEN
General public coming on to the premises and having to queue.	We have put a one-way system in place, allowing 2 meters between customers. We have also placed hand sanitiser at the entrance of the gate, with a sign asking all who enter to use it.
Opening the loos on site.	We will be cleaning the toilets daily with an anti-viral and bacterial cleaner that kills Corona for up to 8 days. Both loos also have hand sanitiser on the entrances which must be used upon leaving and entering.
Boats.	We ask customers to wear gloves, we will supply these at cost price from the office, if they have not brought their own. Boats will be wiped down between customers. People can only be in the same boat if they are from the same household as you cannot socially distance. People must be able to get into the boats unaided by us, we will tie the front of the boat in and stand holding the back, this will allow social distancing whilst the customers enter and exit the boat.
Contact at the office.	We have a Perspex screen in place. Contactless card payments only. Deposits will be taken using sanitised tweezers. The office staff member will have their own personal hand sanitiser for use between customers.
Staff.	Staff will be issued with face shields or masks and gloves. They will always practice social distancing.
Sitting on the lawns.	Benches are socially distanced. Over 2m apart from each bench, to allow traffic.
Bins.	Lids are left off bins, so no staff member has to touch them. When staff take out the bins they will wear gloves and masks.
Buoyancy aids and life jackets.	Used buoyancy aids are stored in a clean bin, until they can be sprayed with anti viral spray and wiped down ready for next use.
